

JAVIEN KENDRICK

AI Systems Builder · Automation Architect · Operations Strategist

Baltimore, MD · (609) 500-5660 · jkendrick0610@gmail.com · linkedin.com · jaivienkendrick.com

AI automation specialist and operations strategist with 3+ years designing and shipping production-grade automation systems that eliminate 40+ hours of manual work weekly and generate measurable cost savings. Background spans regulated financial environments (Morgan Stanley), multi-agent AI infrastructure, and LLM-powered tooling. Published author of *Winning With AI* and AI instructor at the HBCU level. Targeting remote roles where deep technical AI automation expertise translates directly to operational and revenue outcomes.

EXPERIENCE

Operations Analyst — Ops Risk & Regulatory Control | Morgan Stanley · Jul 2025 – Present

- Strengthened operational integrity through risk event reviews and targeted exposure controls aligned with SEC and FINRA requirements.
- Automated routine reporting and validation workflows using Alteryx and UiPath, reducing manual processing time across the team.
- Building an LLM-powered training assistant enabling new hires to query procedures conversationally — reducing onboarding friction and accelerating time-to-competency.
- Validated data quality across regulatory workflows to ensure process alignment with compliance standards.

Founder & AI Automation Consultant | More Life Consulting · 2023 – Jan 2026

- Designed AI automation systems eliminating 40+ hours of manual work per week for clients across HVAC, travel, and startup sectors.
- Reduced client product development timelines from 10–12 months to under 3 months — a 70%+ acceleration in speed-to-market.
- Delivered workflow redesigns generating \$5,000+ in monthly operational savings for small and mid-sized businesses.
- Built production multi-agent infrastructure (orchestrators, sub-agents, API pipelines) using Claude Code, n8n, Make.com, Supabase, and Tailscale for end-to-end autonomous outreach and operations.
- Consulted The James Brand and Virgent AI on digital systems and operational strategy.

Chief Technology Officer | Mission Coach AI · 2024 – Jan 2026

- Designed end-to-end system architecture for an AI coaching platform — spanning auth, billing isolation, multi-tenant data modeling, and LLM integration layers.
 - Architected enterprise pricing tiers with isolated billing logic, ensuring clean separation between user plans and feature access at the infrastructure level.
 - Diagnosed and resolved critical SMS notification bugs affecting user engagement flows, restoring reliability across communication pipelines.
 - Led technical roadmap decisions across product, infrastructure, and AI tooling — translating business goals into scalable system design.
-

EDUCATION

B.S. Business Administration (Marketing) University of Maryland, College Park · May 2025

PUBLICATIONS & TEACHING

Author — *Winning With AI* · Practical guide to AI adoption for business operators.

AI Tools Instructor — Taught applied AI tooling at an HBCU; curriculum covered LLMs, automation platforms, and practical implementation.

TECHNICAL SKILLS

AI & Agents: Claude Code, Multi-Agent Orchestration, LLM APIs, Prompt Engineering, OpenAI, Gemini CLI

Automation & Integration: n8n, Make.com, UiPath, Alteryx, Supabase, REST APIs, AppleScript, Tailscale

Dev & Platforms: Next.js, Vercel, Replit, Cursor, GitHub, Node.js

Analytics & BI: Power BI, Data Quality Validation, Process Analysis

Ops & Compliance: Operational Risk, Regulatory Compliance (SEC/FINRA), Workflow Optimization, Cross-Functional Collaboration

PORTFOLIO
